## Quick Tips

- Enter your search terms in lower case with a space between the terms.

sales offices

You can also enter a full question or concept in plain language.

Where are the sales offices?

- Capitalize proper nouns to search for specific people, places, or products.

John Colter, Netscape Navigator

- Enclose a phrase in double quotes to search for that exact phrase.

"museum of natural history" "museum of modern art"

- Narrow your searches by using a + if a search term must appear on a page.

museum +art

- Exclude pages by using a - if a search term must not appear on a page.

museum -Paris

Combine these techniques to create a specific search query. The better your description of the information you want, the more relevant your results will be.

### 1 [Project notes and demos: An integrated architecture for example-based machine translation](#)

Alexander Franz, Keiko Horiguchi, Lei Duan, Doris Ecker, Eugene Koontz, Kazami Uchida

July 2000 **Proceedings of the 18th conference on Computational linguistics - Volume 2****Publisher:** Association for Computational LinguisticsFull text available: pdf(374.75 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)

This paper describes a machine translation architecture that integrates the use of examples for flexible, idiomatic translations with the use of linguistic rules for broad coverage and grammatical accuracy. We have implemented a prototype for English-to-Japanese translation, and our evaluation shows that the system has good translation quality, and only requires reasonable computational resources.

### 2 [A human simulation validation of a telephone loop network simulation model](#)

H. T. Freedman, T. R. Harms, W. L.G. Koontz

December 1979 **Proceedings of the 11th conference on Winter simulation - Volume 1 WSC '79****Publisher:** IEEE PressFull text available: pdf(727.81 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

A computer simulation model was built to study various strategies for the assignment of telephone loop network facilities to customers. Results of this analysis are presented along with a novel approach to validate the analysis - simulating the simulation model with real data and real assignment personnel.

### 3 [XML in a web-based grammar development environment](#)

Eugene Koontz

September 2002 **Proceedings of the 2nd workshop on NLP and XML - Volume 17 NLPXML '02****Publisher:** Association for Computational LinguisticsFull text available: pdf(229.13 KB) Additional Information: [full citation](#), [abstract](#), [references](#)

Example-based Development of Grammars (EDG) is a natural language parsing and grammatical knowledge representation system, implemented in Common Lisp, that uses XML to display its output. The system parses sentences and allows querying and editing of its linguistic knowledge base. The system's response to user input is in XML, which is then transformed by an XSLT processor to form HTML, which is then displayed by the user's browser. The XML dialect used by the system to represent linguistic stru ...
